Branding Advisory Service

IISC Way ?

IISC is a global supply chain management firm with a unique and specialized focus on the CBD and Nicotine ancillary vaping marketplace. Based out of Shenzhen, China, with offices across Taiwan and factory assets around China, we carry a unique advantage across our main product & service verticals to provide a direct and customized “full service” approach to uniquely fit our client’ s ongoing needs. Ranging from innovative hardware and packaging solutions to comprehensive multi-state / multi-year supply planning, IISC is positioned to be the go-to strategy for businesses ranging from budding startup’ s to vertically integrated public entities.

More than just ID Design

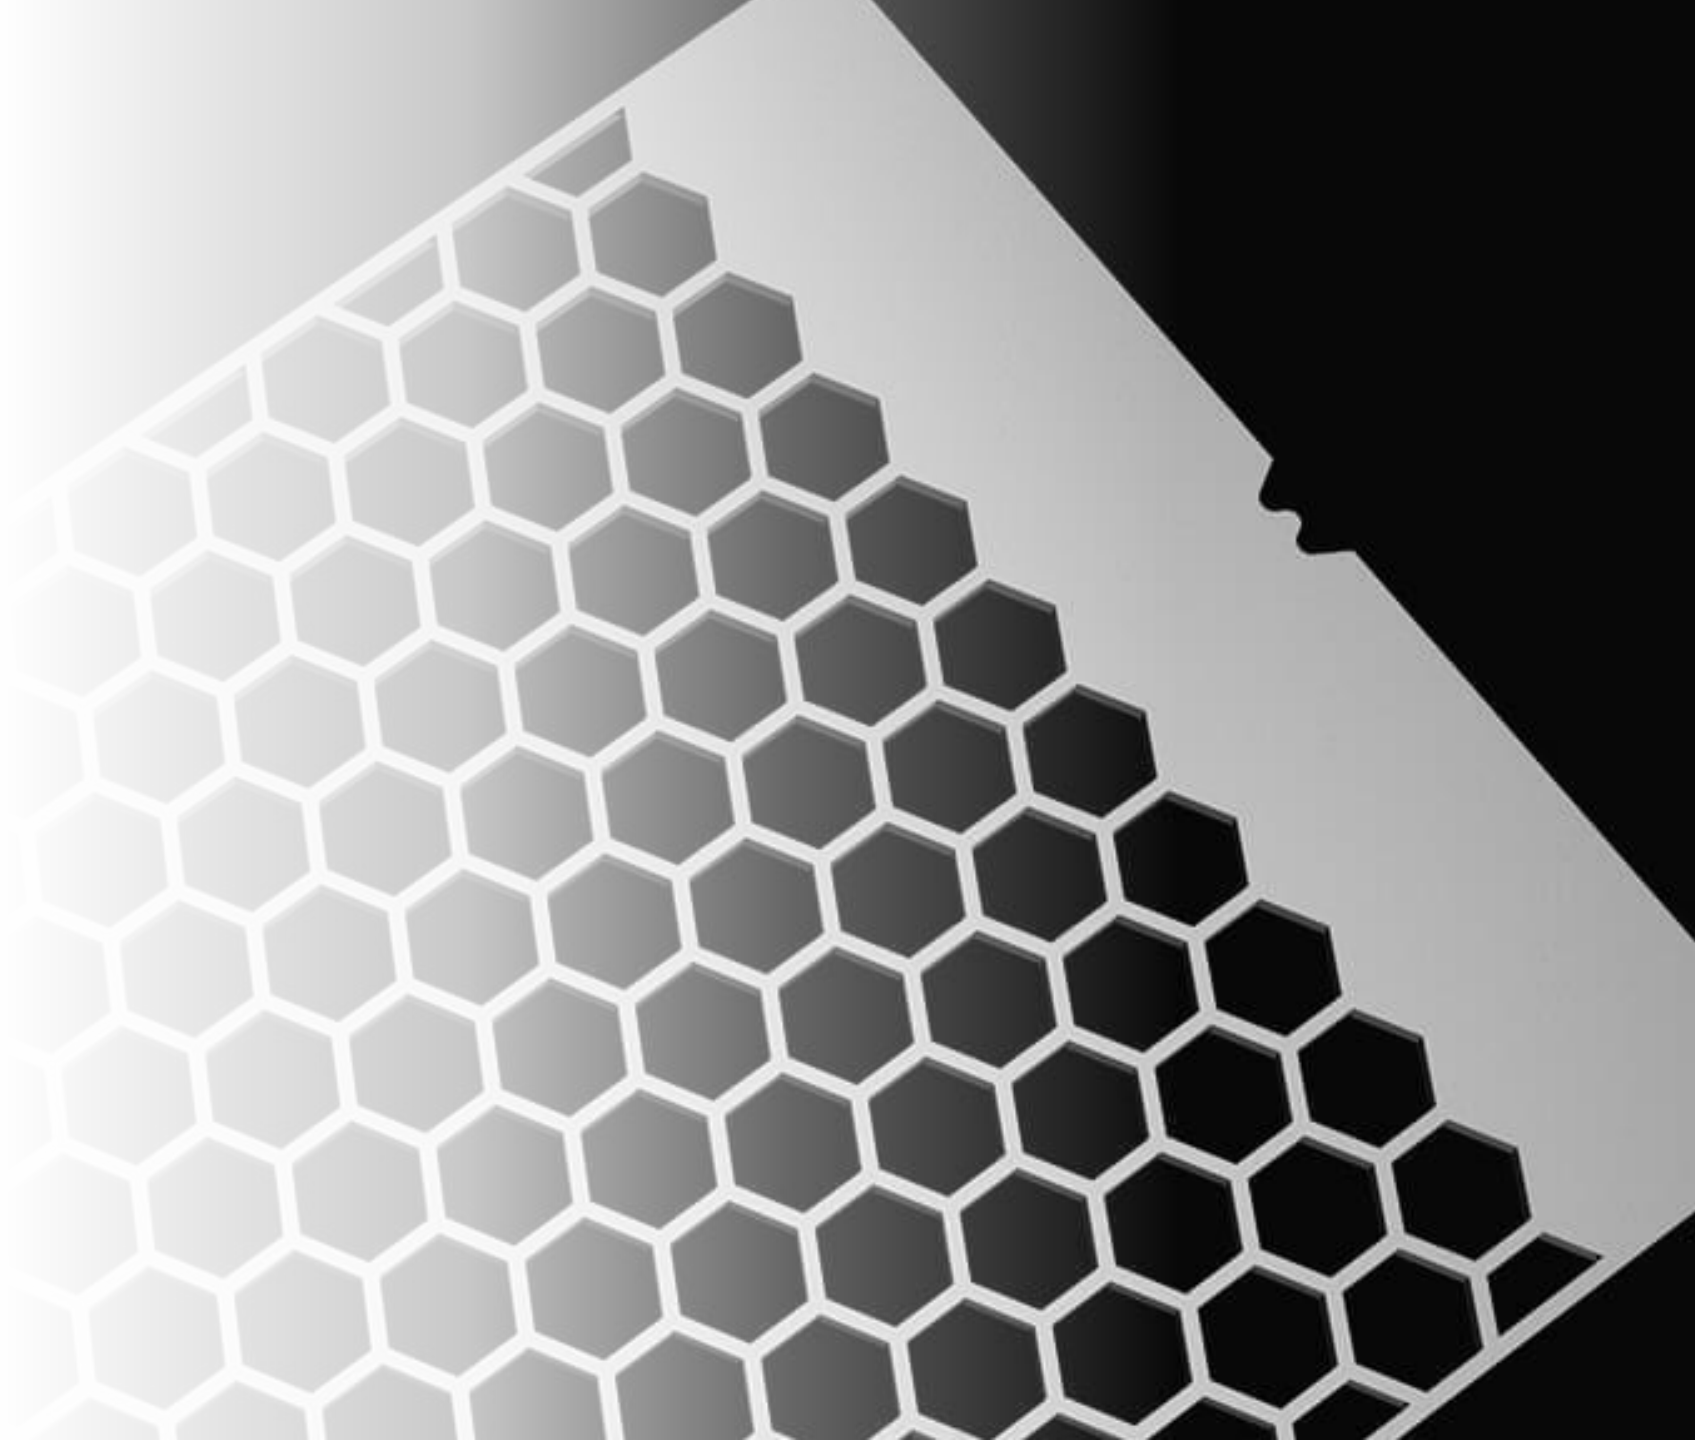

IISC contains quality manufacturing services for high expectation demands. By providing innovative design concepts from internal product structures to external product ID designs. IISC acknowledges the need of Brand Marketing from our clients for their products, therefore, our goal is to provide the most suitable design for every product when its soul has been conceptually created at beginning.

Taste, Flavor, and User experience

IISC emphasizes on user experience in every piece of our product design. We look design as a whole; the combination of all the body parts that gives the best performance for our user is the key. Over 8 years of experience on cotton and ceramic coil devotions, IISC is always the leader in this industry for flavor satisfaction. We do not choose the most expensive materials, only the most suitable elements that can give the best client appreciations.

Craftsmanship Making

There are 25 people in our R&D center team, and we have our own prototype production team. During the 8 years of development, a total of 150 products have been designed, including well-known brands to provide hot-selling designs. There are currently 8 PIE engineers who make SOPs in strict accordance with production standards. The factory already has a CNAS electronic cigarette product testing laboratory configuration. In the relevant qualification application, it can directly provide customers with true and reliable mass production reports and test results.

Idea Fresh & Original ?

IISC works with many prestigious brands for strategic branding design which includes promotional merchandise packaging solutions and distribution & logistic strategy in Asia area. We do accumulate a lot of appreciations and satisfactions from our clients and our goal is to bring more brand values to our branding design to our customers.

Made in Future

IISC provides Bluetooth solution for futuristic application. With our patented micro-chip pod system, information will be saved and transmitted through Bluetooth Technology. Data such as Flavor Tag, Nicotine Level, Battery Level, Puff number and Coil Resistance can all be tracked and adjusted in Mobile App. By playing around with the temperature control function, the Bluetooth pod should be able to give different user experience under one flavor.

+

Push-Lock Design for Leak Proof

IISC engineer teams have develop the ultimate solution for the leak proof issue; Introducing the patented push-lock feature in the vaporizer. In this way, THC and CBD liquid can be consumed much longer without worrying about leaking caused by pressure changing while traveling in the air with vaporizer device.
